

# 3D Video Without Glasses

*Physical Optics Corporation demonstrates a 3D high-definition camera and holographic display system at GSFC. Live stereo-component imagery flows from College Park, MD across a 10 gigabit network link.*

*Photos: Kevin Fisher (GSFC)*

POC Vice President Dr. Andrew Kostrzewski (right) describes the display unit at a demonstration on July 27, 2005. POC is a NASA SBIR Phase I awardee.

Display achieves 3D viewing effects from HD camera feed or computer rendered imagery (above) without special glasses.
